COMMENTS FROM THE TOWN MANAGER'S OFFICE

Last week in this column I indicated there was a question as to whether or not we could use DDT for insect control. The final answer was that we could. The problem was with the Department of Agriculture as traces of DDT had been detected in some hay samples taken in this area.

Through the assistance of Mrs. Lincoln in Augusta we were assured there would be no objection from the State level if we used the chemical in such a way as not to contaminate forage crops. The same person who has been doing the aerial spraying for several years was contacted and told of our findings. He agreed to spray the compact area only, as he felt he was taking too much of a risk to attempt the out-lying sections.

We have done some outside of the village using truck spraying equipment. The results of this equipment should be watched closely as another year it may be impossible to get anyone to do the aerial spraying.

A CHICKADEE FOR LADY BIRD

When the President's wife, Lady Bird Johnson, visited Maine last week a lady was seen giving the First Lady an object which she had removed from her own dress. When asked by newsmen what the gift was, she reported that it was a pin in the form of a chickadee made by a woman who lives in Bethel. These pins, representing our state bird, are made by Mrs. Winona Davis who lives just outside the village on the West Bethel road, and many of them have been distributed in Augusta by Mrs. Louise Lincoln, Representative to Legislature.
